

1. Download Sox [SoX - Sound eXchange | HomePage \(sourceforge.net\)](http://sourceforge.net/projects/sox/)
2. Double click on the file you downloaded and install it.
3. On Windows, go to My Computer → Properties → Advanced System Settings → Environment Variables → System variables.
4. Select Path.
5. Click Edit → New :
6. Add this: C:\Program Files (x86)\sox-<CHECK YOUR VERSION NUMBER>\
As indicated in the example path, make sure to check what version of Sox you have installed by actually navigating to your Program Files (x86) folder and looking for a folder that starts with sox, for example sox-14-4-2.
7. Copy the ConvertRaw2Wav.cmd and paste it in your folder which contains the RAW files
8. Double click on ConvertRaw2Wav.cmd
9. Each RAW file should have a WAV copy appearing in the same folder
